

He creado un proyecto completo con solo una entidad, cuando termino, pulso el botón de ‘Generate CDM Project (.zip)’

Se genera el proyecto correctamente y los logs no muestran ningún fallo

| ENTITY NAME | TIME-VARYING | NUMBER OF VARIABLES | Nº CATALOG VARS | VALIDATION RULES? |
|-------------|--------------|---------------------|-----------------|-------------------|
| person | No | 9 | 6 | Yes |

```
[10:55:38] ✓ Schema validated successfully
[10:55:38] Generating metadata and documentation...
[10:55:38] Fetching license text...
[10:55:38] Creating CDM structure and Excel...
[10:55:38] Starting synthetic data engine...
[10:55:38] Processing entity: person...
[10:55:38] ✓ Synthetic data generated.
[10:55:38] Packaging validation scripts...
[10:55:38] 📦 Compressing ZIP file...
[10:55:38] 🎉 Process finished successfully!
```

 **Execution Log**

```
[10:55:38] ✓ Schema validated successfully
[10:55:38] Generating metadata and documentation...
[10:55:38] Fetching license text...
[10:55:38] Creating CDM structure and Excel...
[10:55:38] Starting synthetic data engine...
[10:55:38] Processing entity: person...
[10:55:38] ✓ Synthetic data generated.
[10:55:38] Packaging validation scripts...
[10:55:38] 📦 Compressing ZIP file...
[10:55:38] 🎉 Process finished successfully!
```

Cuando reinicio la web e intento cargar el proyecto desde JSON, no puedo cargar el proyecto y sale una pantalla con 28 warnings y no me deja cargar el proyecto.

Validation errors:

Found 28 validation errors:

1. Field 'entities/0/variables/0': must have required property 'transformations_from_origin'
2. Field 'entities/0/variables/0': must have required property 'examples'
3. Field 'entities/0/variables/0': must have required property 'catalog'
4. Field 'entities/0/variables/1': must have required property 'transformations_from_origin'
